Systèmes Didactiques s.a.r.l.
Equipement pour l'enseignement expérimental, scientifique et technique

Date d'édition : 02.11.2026

Ref : 662217

Module synapse

Shown on the front is a pre-synaptic terminal. The module can generate impulses between 0 and 30 Hz (continuously variable) and may be used for stimulation of nerve cell modules. A receptor and a synaptic link are provided in addition which may be influenced by other modules (nervous or chemical presynaptic influences such as drugs).

Caractéristiques techniques
1 output for inhibiting impulses (red)1 output for stimulating impulses (green)Dimensions: 125 x 125 x45 mmWeight: 0.2 kg

Import texte : janvier 2015
