HRET Energy Trainer Solar 20 W ,Wind 200 W, Fuel Cell 30 W

Documentation technique et pédagogique en anglais

The Renewable Energy Training Set is prepared for the purpose of experimenting in solar based electricity production. The experiment set is designed in accordance with the curricula of all institutions requiring technical education which can be listed as technical universities, technical high schools and any institution in need of technical education. In the experiment set, user safety is prioritized in accordance with legal regulations. Laser technology is used to draw the symbols and write the technical briefs on the modules.

The content of the training set is applicable for advanced technical training, including basic training as well. The entire set of experiment unit consists of modules that can be easily attached to and removed from the main unit, depending on the experimental work to be carried out. All of the components used in the modules are authentic products or their counterparts which are produced for industrial purposes.
